SUMMARY

Computer Science & Engineering student and sole maintainer of shaheentire.com, my family's live e-commerce store: took it over failing, launched online payments, and grew its Google search traffic about 15×. I build the tools I need and ship them – an offline voice typer, a glucose-sensor app, a daily planner. AI-first developer: I use Claude Code heavily and review every change myself.

EDUCATION

Egypt-Japan University of Science and Technology (E-JUST)

Oct 2023 – Feb 2028 (expected)

B.Sc. Computer Science & Engineering

EXPERIENCE

e& (Etisalat)

Aug 2026 – Sep 2026

UI/UX Design Intern

Cairo (Hybrid)

- Audited the live e& CX Solutions enterprise site end-to-end: 26 findings, 4 high-severity – including 11 employee emails exposed in page source (PDPL risk, escalated to legal) and a 38.6 MB homepage from auto-playing background videos
- Corrected the team's stack diagnosis (hash-routed Angular SPA, not "old Bootstrap"), reframing the search-visibility problem as routing rather than styling
- Built a tokenized Figma design system (9 color families, light/dark semantic tokens) and redesigned the landing page within the governed e& brand

Shaheen for Import & Export

Aug 2022 – Present

Sales → Operations → Technical Lead (family business)

Tanta, Egypt

- Took over shaheentire.com – a production Laravel 12 platform built by an external team – in May 2026 as sole maintainer and brought it back from failing: 1,000+ commits, 530 pull requests merged, 361 issues closed, 38 failing tests fixed, automated deploys
- Launched online card and mobile-wallet payments (Paymob, Sep 2026) with server-verified confirmation and automatic cancel-and-restock of unpaid orders
- Grew Google search clicks about 15× in under two months (318 per 90 days → 1,608 per 28 days); branded-search share fell from 84% to 4% as customers found the store by searching for tires
- Built the internal staff platform: task board, shared calendar, notifications, an Excel price-list import pipeline, and an import cost calculator matching the owner's spreadsheet to within 0.01 EGP

Optima Professional Services

Jun 2026 – Jul 2026

Cybersecurity Intern

New Cairo, Egypt

- Cisco Packet Tracer and Palo Alto firewall labs (OSPF, EIGRP); Nmap scanning; red team CTF exercises

PC Building Store

Jun 2019 – Aug 2022

Technical Assistant

Tanta, Egypt

- Assembled 40+ custom PC builds; diagnosed hardware and software issues (BIOS, thermals, drivers)

PROJECTS

Sotto – Offline Voice Dictation

Rust, Tauri v2, ONNX Runtime, Parakeet ASR, llama.cpp

- Desktop app that transcribes speech, polishes it with a local AI model, and pastes it anywhere – fully offline; 70× faster recognition via Vulkan GPU acceleration

Sukoon – Glucose Monitor Viewer

Kotlin, Jetpack Compose, Room, Material 3

- Android app for my own Type 1 diabetes management, replacing the stock sensor app: glucose graphs, insulin tracking, clean dashboard

Kai's Flow – Personal Planner

React 19, TypeScript, Supabase, FullCalendar

- Daily-use planner: calendar time-blocking, tasks, journal, and focus timer; works offline; deployed on Cloudflare Workers

MRL Eye – Drowsiness Detection

PyTorch, DenseNet121, ViT, OpenCV, Arduino

- Trained DenseNet121 and ViT models on about 84,000 infrared eye images (>96% validation accuracy); real-time webcam alert with an Arduino buzzer

SKILLS

How I work: AI-first development with Claude Code – I plan the change, review every diff, and verify it with tests

Shipped with: PHP / Laravel 12 (shaheentire.com) · TypeScript / React (Kai's Flow) · Rust / Tauri (Sotto) · Kotlin / Compose (Sukoon) · Python / PyTorch, FastAPI

Data & deploys: SQLite, PostgreSQL, Supabase, Docker Compose, GitHub Actions, Cloudflare

Design: Figma (Variables, design tokens), UX audits, design systems

Languages: Arabic (Native), English (Fluent)
