IT operations lead who designed and executed a full digital transformation for a multi-generational retail enterprise: cloud infrastructure migration (1,343 files), zero-cost federated identity with RBAC (5 groups), production e-commerce deployment, and an AI-powered enterprise chatbot -- all while managing a 10+ person marketing division through a RACI accountability framework.

EDUCATION

Egypt-Japan University of Science and Technology (E-JUST)

Oct 2023 -- Feb 2028

B.Sc. Computer Science & Engineering | cGPA: 3.2

Coursework: Computer Networks, Project Management, Data Structures, Probability & Statistics

EXPERIENCE

Shaheen for Import & Export

Aug 2022 -- Present

IT & Operations Lead

Family enterprise: tire/battery import & distribution across all 27 Egyptian governorates

- Designed and executed a 4-phase enterprise cloud migration of 1,343 files into an 8-folder master Google Drive architecture with Arabic text normalization, idempotent diffing, and an isolated Security Quarantine for credentials -- eliminating data silos across 4 retail branches
- Engineered a zero-cost federated identity system: cPanel IMAP/SMTP email → Google IAM (free accounts) → Google Drive RBAC, bypassing Workspace licensing for 10-20 non-technical employees while enforcing 5-tier access control (Admin/IT/Retail/Marketing/Sales)
- Deployed a production Laravel 12 e-commerce platform (shaheentire.com) with Paymob payment integration (HMAC SHA-512 verification, cards + mobile wallets), bilingual AR/EN catalog of 519 products, and Filament 4 admin panel
- Built a WhatsApp AI chatbot (FastAPI + Gemini 1.5 Flash) enabling non-technical staff to query enterprise Drive files via natural language, with zero-trust 3-layer security architecture preventing prompt injection and unauthorized access
- Established RACI-based operational framework across 8 non-overlapping verticals (System Architecture, Social Strategy, Content, Video, Talent, Community, Paid Social, Analytics) for a 10+ person marketing division, eliminating role overlap through Gherkin-style (Given/When/Then) workflow handoff protocols
- Managed domain infrastructure: Cloudflare DNS/SSL, cPanel email aliases (social@/vendors@/billing@/admin@shaheentire.com), Bitwarden password management, SSH deploy keys, auto-deploy pipeline, nightly server-repo drift monitoring
- Resolved digital adoption bottleneck by deploying cPanel webmail as mobile PWA ("Add to Home Screen"), creating Arabic visual SOPs, and appointing internal "Tech Translator" proxies for ongoing support

Digital Egypt Pioneers Initiative (DEPI Round 4)

Jun 2026 -- Present

Cybersecurity Intern

- Simulating secure network architectures, routing protocols (OSPF, EIGRP), and defense topologies in Cisco Packet Tracer as part of an advanced cybersecurity training track

PC Building Store

Jun 2019 -- Aug 2022

Technical Assistant

- Assembled 40+ custom PCs; diagnosed hardware/software issues; advised on cost-effective upgrades

PROJECTS

Enterprise Google Drive Architecture & RBAC System

Python, Google Drive API, cPanel

- Architected an 8-folder bilingual (Arabic/English) master directory with keyword-based content routing and Security Quarantine isolation for Postman collections, Merchant Center feeds, and credentials
- Implemented role-based access control: Admin (Global Editor), IT (Global + Security), Retail (Branch-specific), Marketing (Media folders), Sales (Viewer-only catalogs/pricing)

Windows SMB Infrastructure

PowerShell, NTFS ACLs

- Developed 7 PowerShell scripts for secure file sharing: NTLM registry configuration, ADB reverse tunneling, hidden user provisioning, share-level + NTFS-level ACL enforcement, SMB lockdown/reversal, and Windows performance optimization

Scentura ERP

Django 6, React 19, PostgreSQL

- Architected a 22-app Django ERP with event-sourced inventory, 8-role RBAC, JWT authentication, and ML-powered demand forecasting

Customer Ordering System

FastAPI, Docker, HuggingFace

- Built a vertically-sliced backend with PII redaction middleware, PromptInjectionGuard, automated ticket triage, and containerized PostgreSQL deployment

TECHNICAL SKILLS

Infrastructure	Cloudflare, cPanel, Google Cloud Identity Free, Bitwarden, SSH/SFTP, SMB/NTFS ACLs, Docker, ngrok
Networking	Cisco Packet Tracer (OSPF, EIGRP), Nmap/Zenmap, SMB config, IMAP/SMTP/SSL
Backend	FastAPI, Django 6, Laravel 12, Python automation
IAM & Security	RBAC (5-tier), JWT, zero-trust interceptors, PII redaction, prompt injection defense
Management	RACI matrices, Gherkin-style protocols, Akiflow/ToDoist/Notion
Design	Figma, Photoshop, Illustrator, Canva
